

Robot/SPACE 3.0 Enhancements

Active Job Storage Monitoring

- Existing Job Temporary Storage Monitor was complimented by adding monitors for QTEMP and Spooled Files.
- All job monitors can track detail information for every threshold exception in addition to the summary.
- New Robot/GUIDE to set up active job storage monitors.

Storage Audits

- Added support for *ALLAVL ASP group.
- View job information for audit jobs from history.

Storage Collections

- Added advanced options for tracking member statistics and using object size filters.
- IFS filters support ASP group restriction.
- Collection comparison feature supports members, output queues, IFS files, and IFS directories.
- On-demand reporting of collection statistics.
- View job information for collection jobs from Explorer.

Queries and Reports

- Added SPCQRYRPT command.
- Added collection comparison reports for members, output queues, IFS files, and IFS directories.

General Product Enhancements

- Import and export function has been improved.
- Added role-based product security.
- Enhanced Data Filter Manager to create, save, and edit saved filters.
